

Mains Voltage (240v ) must only be installed by a licensed electrician and meet all local regulatory requirements. Ensure mains voltage is switched off.

- A. Remove corresponding magnetic hole cover from each numbered position. Install 4mm or 8mm rubber grommet into required holes. Remove side entry hole cap if needed.
- B. Fix the ceiling bracket to the ceiling. Suspend the plate from the 4x steel wires attached.
- C. From below, feed the electrical cable of the pendant lights through required holes. Secure pendants at desired height using the provided cord grips (cable diameter 8mm or 4mm) and correct sized rubber washer (provided).
- D. Make electrical connection, ensure LED driver/s used if required.
- E. Make final adjustments to pendant height
