DESCRIPTION

Engineered for versatility and ease of specification, the Multi-Drop Magnetic Canopy provides a refined foundation for custom pendant clusters, balancing technical performance with a calm, understated aesthetic.

Predetermined fixing points enable freedom in pendant placement, while unused positions are discreetly concealed with colour matched magnetic covers. These sit flush with the canopy surface, creating a seamless finish that maintains visual simplicity regardless of configuration.

Designed to bring clarity and flexibility to large pendant installations, the canopy supports up to 11 pendants for the small, and 31 for pendant for the large, allowing for considered compositions across residential and commercial interiors.
